

MRX.JunctionBox, marine

Rugged connection unit for zoom and PTZ cameras of MRX.marine system

Sales ID: 2503-3301

Sales ID: 2503-3401

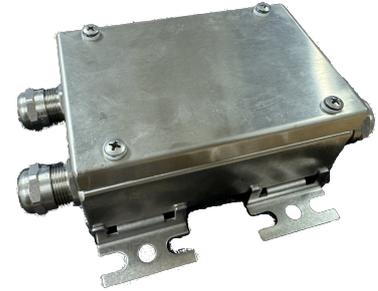

x Easy installation

x Makes it easier to swap cameras

x two different types:

1x MRX.camera, marine, PTZ-dome

1x MRX.camera, marine, zoom

MRX.marine is a video transmission and camera control system for the maritime sector. Three different types of marine-grade cameras are available to enable a wide range of applications. The system offers the option of connecting up to 14 cameras. A modular approach has been designed to enable tailor-made solutions to be implemented. The operator has a complete overview on up to three monitors displaying the video images, providing a comprehensive view of what is happening. They can control the cameras to make their work easier.

The video images are stored internally for several days so that events can be analysed retrospectively.

Technical Specifications

General

- Marine-grade connection unit for MRX.marine

Connections

- external
 - ∩ 3x cable glands
 - 1x towards camera
 - 2x towards switching unit

Physics

- Housing: V2A stainless steel
- Weight: 1.3 kg
- Dimensions: 200x100x70mm
- Mounting: Wall or pole mounting
- Lock: 4x Phillips screw

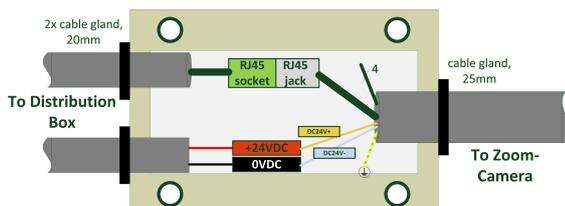

Environment

- Ambient conditions
 - ∩ outdoor, offshore
 - ∩ Operation: -40..+60°C
 - ∩ Storage: -10 .. +40 °C
 - ∩ Rel. humidity: 20-95%, non-cond.

Certifications

- ∩ CE, eMark regulations
- ∩ RoHS, REACH

Scheme for zoom camera
